

## Safety data sheet Ethane

Creation date : 28.01.2005  
Revision date : 19.07.2011

Version : 1.2

IE / E

SDS No. : 051a  
page 1 / 6

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

**Product name**  
Ethane

EC No (from EINECS): 200-814-8

CAS No: 74-84-0

Index-Nr. 601-002-00-X

**Chemical formula** C<sub>2</sub>H<sub>6</sub>

**REACH Registration number:**  
Not available.

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

##### Relevant identified uses

Industrial and professional. Perform risk assessment prior to use.

##### Uses advised against

Consumer use.

#### 1.3. Details of the supplier of the safety data sheet

##### Company identification

BOC, PO Box 1201, Bluebell, Dublin

**E-Mail Address** ReachSDS@boc.com

#### 1.4. Emergency telephone number

**Emergency phone numbers (24h):** 1850 333 435

### SECTION 2: Hazards identification

#### 2.1. Classification of the substance or mixture

##### Classification acc. to Regulation (EC) No 1272/2008/EC (CLP/GHS)

Press. Gas (Liquefied gas) - Contains gas under pressure; may explode if heated.

Flam. Gas 1 - Extremely flammable gas.

##### Classification acc. to Directive 67/548/EEC & 1999/45/EC

F+; R12

Extremely flammable.

##### Risk advice to man and the environment

Liquefied gas.

Contact with liquid may cause cold burns/frost bite.

#### 2.2. Label elements

##### - Labelling Pictograms

##### - Signal word

Danger

##### - Hazard Statements

H280

Contains gas under pressure; may explode if heated.

H220

Extremely flammable gas.

##### - Precautionary Statements

##### Precautionary Statement Prevention

P210

Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

### Precautionary Statement Response

P377

Leaking gas fire: Do not extinguish, unless leak can be stopped safely.

P381

Eliminate all ignition sources if safe to do so.

### Precautionary Statement Storage

P403

Store in a well-ventilated place.

### Precautionary Statement Disposal

None.

#### 2.3. Other hazards

Contact with liquid may cause cold burns/frost bite.

### SECTION 3: Composition/information on ingredients

**Substance / Mixture:** Substance.

#### 3.1. Substances

Ethane

**CAS No:** 74-84-0

**Index-Nr.:** 601-002-00-X

**EC No (from EINECS):** 200-814-8

**REACH Registration number:**

Not available.

Contains no other components or impurities which will influence the classification of the product.

#### 3.2. Mixtures

Not applicable.

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

##### First Aid General Information:

Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

##### First Aid Inhalation:

Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

##### First Aid Skin / Eye:

For liquid spillage - flush with water for at least 15 minutes. In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Obtain medical assistance. Immediately flush eyes thoroughly with water for at least 15 minutes.

##### First Aid Ingestion:

Ingestion is not considered a potential route of exposure.

#### 4.2. Most important symptoms and effects, both acute and delayed

In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation. In low concentrations may cause narcotic effects. Symptoms may include dizziness, headache, nausea and loss of coordination.

#### 4.3. Indication of any immediate medical attention and special treatment needed

None.

### SECTION 5: Fire fighting measures

#### 5.1. Extinguishing media

# Safety data sheet

## Ethane

Creation date : 28.01.2005  
Revision date : 19.07.2011

Version : 1.2

IE / E

SDS No. : 051a  
page 2 / 6

### Suitable extinguishing media

Water fog. Dry powder. Carbon dioxide. Use water spray or fog to control fire fumes.

### Unsuitable extinguishing media

Do not use a solid water stream.

## 5.2. Special hazards arising from the substance or mixture

### Specific hazards

Exposure to fire may cause containers to rupture/explode.

### Hazardous combustion products

If involved in a fire the following toxic and/or corrosive fumes may be produced by thermal decomposition:

Carbon monoxide.

## 5.3. Advice for fire-fighters

### Specific methods

If possible, stop flow of product. Move container away or cool with water from a protected position. Do not extinguish a leaking gas flame unless absolutely necessary. Spontaneous/explosive re-ignition may occur. Extinguish any other fire. Prevent water used in emergency cases from entering sewers and drainage systems.

### Special protective equipment for fire-fighters

Normal firefighters' equipment consists of an appropriate SCBA (open-circuit positive pressure compressed air type) in combination with fire kit. Equipment and clothing to the following standards will provide a suitable level of protection for firefighters. Clothing for firefighters conforming to EN 469 will provide a basic level of protection from chemical incidents. EN 469:2005: Protective clothing for firefighters. Performance requirements for protective clothing for firefighting. EN 15090 Footwear for firefighters. EN 443 Helmets for fire fighting in buildings and other structures. EN 659 Protective gloves for firefighters. EN 137 Respiratory protective devices — Self-contained open-circuit compressed air breathing apparatus with full face mask — Requirements, testing, marking.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe. Evacuate area. Ensure adequate air ventilation. Eliminate ignition sources. Use protective clothing. Consider the risk of potentially explosive atmospheres.

### 6.2. Environmental precautions

Try to stop release. Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous.

### 6.3. Methods and material for containment and cleaning up

Ventilate area.

### 6.4. Reference to other sections

See also sections 8 and 13.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

The substance must be handled in accordance with good industrial hygiene and safety procedures. Suck back of water into the container must be prevented. Purge air from system before introducing gas. Do not allow backfeed into the container. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Keep away from ignition sources (including static discharges). Refer to supplier's handling instructions. Purge system with dry inert gas (e.g. helium or nitrogen) before gas is introduced and when system is placed out of service. Assess the risk of

potentially explosive atmosphere and the need for explosion-proof equipment. Consider the use of only non-sparking tools. Do not smoke while handling product. Only experienced and properly instructed persons should handle gases under pressure. Protect containers from physical damage; do not drag, roll, slide or drop. Never use direct flame or electrical heating devices to raise the pressure of a container. Do not remove or deface labels provided by the supplier for the identification of the container contents. When moving containers, even for short distances, use appropriate equipment eg. trolley, hand truck, fork truck etc. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use. Ensure the complete gas system has been (or is regularly) checked for leaks before use. If user experiences any difficulty operating container valve discontinue use and contact supplier. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment. Keep container valve outlets clean and free from contaminants particularly oil and water. Never attempt to transfer gases from one container to another. Ensure equipment is adequately earthed. Take precautionary measures against static discharges.

### 7.2. Conditions for safe storage, including any incompatibilities

Secure cylinders to prevent them from falling. Segregate from oxidant gases and other oxidants in store. Keep container below 50°C in a well ventilated place. Observe all regulations and local requirements regarding storage of containers. Cylinders should be stored in the vertical position and properly secured to prevent falling over. Containers should not be stored in conditions likely to encourage corrosion. Stored containers should be periodically checked for general conditions and leakage. Container valve guards or caps should be in place. Store containers in location free from fire risk and away from sources of heat and ignition. Keep away from combustible materials. All electrical equipment in the storage areas should be compatible with the risk of potentially explosive atmosphere.

### 7.3. Specific end use(s)

None.

## SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

No occupational exposure limit.

### 8.2. Exposure controls

#### Appropriate engineering controls

A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered. Product to be handled in a closed system. Gas detectors should be used when quantities of flammable gases/vapours may be released. Keep concentrations well below lower explosion limits. Consider work permit system e.g. for maintenance activities. Systems under pressure should be regularly checked for leakages. Provide adequate general or local ventilation. The substance is not classified for human health hazards or for environment effects and it is not PBT or vPvB so that no exposure assessment or risk characterisation is required. For tasks where the intervention of workers is required, the substance must be handled in accordance with good industrial hygiene and safety procedures.

#### Personal protective equipment

#### Eye and face protection

# Safety data sheet

## Ethane

Creation date : 28.01.2005  
Revision date : 19.07.2011

Version : 1.2

IE / E

SDS No. : 051a  
page 3 / 6

Protect eyes, face and skin from liquid splashes. Wear a face-shield when transfilling and breaking transfer connections. Safety eyewear, goggles or face-shield to EN166 should be used to avoid exposure to liquid splashes. Full-face mask recommended

Guideline:

EN136 Respiratory protective devices. Full face masks. Requirements, testing, marking

### Skin protection

### Hand protection

Advice: Wear cold insulating gloves.

Guideline: EN 511 Protective gloves against cold.

Advice: Wear working gloves and safety shoes while handling containers.

### Body protection

Protect eyes, face and skin from contact with product. Keep suitable chemically resistant protective clothing readily available for emergency use. Personal protective equipment for the body should be selected based on the task being performed and the risks involved.

Guideline:

EN 943: Protective clothing against liquid and gaseous chemicals, aerosols and solid particles. Performance requirements for gas-tight (Type 1) chemical protective suits for emergency teams

### Other protection

Wear flame resistant/retardant clothing. Take precautionary measures against static discharges. Wear working gloves and safety shoes while handling containers. ISO 20345 Safety footwear.

### Respiratory protection

Not required

### Thermal hazards

If there is a risk of contact with the liquid, all protective equipment should be suitable for extremely low temperatures.

### Environmental Exposure Controls

Specific risk management measures are not required beyond good industrial hygiene and safety procedures. Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

#### General information

**Appearance/Colour:** Colourless gas.

**Odour:** None. Stenchant often added

**Melting point:** -183 °C

**Boiling point:** -88,6 °C

**Flash point:** Not applicable for gases and gas mixtures.

#### Evaporation rate:

Not applicable for gases and gas mixtures.

**Flammability range:** 2,4 %(V) - 16 %(V)

**Vapour Pressure 20 °C:** 37,8 bar

**Relative density, gas:** 1,038

**Solubility in water:** 61 mg/l

**Partition coefficient: n-octanol/water:** 1,81 logPow

**Autoignition temperature:** 515 °C

#### Viscosity:

Dynamic: 0,042 mPa.s

**Molecular weight:** 30 g/mol

**Critical temperature:** 32 °C

**Relative density, liquid:** 0,54

### 9.2. Other information

Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

## SECTION 10: Stability and reactivity

### 10.1. Reactivity

Unreactive under normal conditions.

### 10.2. Chemical stability

Stable under normal conditions.

### 10.3. Possibility of hazardous reactions

May react violently with oxidants., Can form potential explosive atmosphere in air.

### 10.4. Conditions to avoid

Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

### 10.5. Incompatible materials

Oxidising agents. Air, Oxidiser. For material compatibility see latest version of ISO-11114.

### 10.6. Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced. If involved in a fire the following toxic and/or corrosive fumes may be produced by thermal decomposition:

Carbon monoxide.

## SECTION 11: Toxicological information

### 11.1. Information on toxicological effects

#### Acute inhalation toxicity

Value: LC50

Species: Rat

Exposure time: 0,25 h

Value in standard unit mg/l: 1.443 mg/l

Read across

Value: EC50

Species: Rat

Exposure time: 0,17 h

Value in non-standard unit: 504,96 mg/m<sup>3</sup>

Read across

#### Repeated dose toxicity

Species: Rat

Route of application: Inhalation

Value type: NOAEC

Value: 19678 mg/m<sup>3</sup>

Species: Rat

Route of application: Inhalation

Value type: NOAEC

Value: 21394 mg/m<sup>3</sup>

Read across

#### Genetic toxicity in vitro

Test type: Ames test in vitro:

Result: Negative.

Method: OECD Test Guideline 471

Read across

#### Genetic toxicity in vivo

Test type: Drosophila SLRL test

Negative.

#### Assessment mutagenicity

There is no evidence of mutagenic potential.

#### Toxicity to reproduction/fertility

Test type: Gestation

Species: Rat

Route of application: Inhalation

## Safety data sheet Ethane

Creation date : 28.01.2005  
Revision date : 19.07.2011

Version : 1.2

IE / E

SDS No. : 051a  
page 4 / 6

Value type: NOAEC  
Value: 9.000 ppm  
Method: OECD Guideline 422 (Combined Repeated Dose Toxicity Study with the Reproduction / Developmental Toxicity Screening Test)

Test type: Fertility  
Species: Rat  
Route of application: Inhalation  
Value type: NOAEC  
Value: 3.000 ppm  
Method: OECD Guideline 422 (Combined Repeated Dose Toxicity Study with the Reproduction / Developmental Toxicity Screening Test)

### Developmental toxicity/teratogenicity

Species: Rat  
Route of application: Inhalation  
Value type: NOAEC  
Value: 9.000 ppm  
Method: Read across

Method: OECD Guideline 422 (Combined Repeated Dose Toxicity Study with the Reproduction / Developmental Toxicity Screening Test)

Species: Rat  
Route of application: Inhalation  
Value type: NOAEC  
Value: ppm  
Method: OECD Guideline 422 (Combined Repeated Dose Toxicity Study with the Reproduction / Developmental Toxicity Screening Test)

### Neurological effects

Negative.

## SECTION 12: Ecological information

### 12.1. Toxicity

No known ecological damage caused by this product.

#### Acute toxicity aquatic invertebrates

Species: Water flea (Daphnia magna)  
Exposure time: 48 h  
Value type: LC50  
Value in standard unit mg/l: 46,6 mg/l

Species: Water flea (Daphnia magna)  
Exposure time: 48 h  
Value type: LC50  
Value in standard unit mg/l: 14,22 mg/l  
Read across

#### Toxicity aquatic plants

Test type: Fresh water  
Species: Algae  
Exposure time: 96 h  
Value type: EC50  
Value in standard unit mg/l: 16,47 mg/l

Test type: Fresh water  
Species: Algae  
Exposure time: 96 h  
Value type: EC50  
Value in standard unit mg/l: 7,71 mg/l

### 12.2. Persistence and degradability

#### Photo degradation

Half life (direct photolysis): 1.906 d

Compartment: Air  
**Biodegradation**  
Readily biodegradable

### 12.3. Bioaccumulative potential

Not applicable.

### 12.4. Mobility in soil

Not applicable.

### 12.5. Results of PBT and vPvB assessment

Not classified as PBT or vPvB.

### 12.6. Other adverse effects

Not applicable.

## SECTION 13: Disposal considerations

### 13.1. Waste treatment methods

Do not discharge into areas where there is a risk of forming an explosive mixture with air. Waste gas should be flared through a suitable burner with flash back arrestor. Do not discharge into any place where its accumulation could be dangerous. Contact supplier if guidance is required. Refer to the EIGA code of practice (Doc.30 "Disposal of Gases", downloadable at <http://www.eiga.org>) for more guidance on suitable disposal methods.

Gases in pressure containers (including halons) containing dangerous substances

**EWC Nr. 16 05 04\***

## SECTION 14: Transport information

### ADR/RID

#### 14.1. UN number

1035

#### 14.2. UN proper shipping name

Ethane

#### 14.3. Transport hazard class(es)

Class: 2  
Classification Code: 2F  
Labels: 2.1  
Hazard number: 23  
Tunnel restriction code: (B/D)  
Emergency Action Code: 2YE

#### 14.4. Packing group (Packing Instruction)

P200

#### 14.5. Environmental hazards

None.

#### 14.6. Special precautions for user

None.

### IMDG

#### 14.1. UN number

1035

#### 14.2. UN proper shipping name

Ethane

#### 14.3. Transport hazard class(es)

Class: 2.1

## Safety data sheet Ethane

Creation date : 28.01.2005  
Revision date : 19.07.2011

Version : 1.2

IE / E

SDS No. : 051a  
page 5 / 6

Labels: 2.1  
EmS: FD,SU,

#### 14.4. Packing group (Packing Instruction)

P200

#### 14.5. Environmental hazards

None.

#### 14.6. Special precautions for user

None.

#### 14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

Not applicable.

#### IATA

#### 14.1. UN number

1035

#### 14.2. UN proper shipping name

Ethane

#### 14.3. Transport hazard class(es)

Class: 2.1  
Labels: 2.1

#### 14.4. Packing group (Packing Instruction)

P200

#### 14.5. Environmental hazards

None.

#### 14.6. Special precautions for user

None.

#### Other transport information

Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers ensure that they are firmly secured. Ensure that the valve outlet cap nut or plug (where provided) is correctly fitted. Ensure that the valve protection device (where provided) is correctly fitted. Ensure adequate ventilation. Ensure compliance with applicable regulations. Ensure that the container valve is closed and not leaking.

#### SECTION 15: Regulatory information

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Directive 96/82/EC: Listed

#### Other regulations

Council Directive 89/391/EEC on the introduction of measures to encourage improvements in the safety and health of workers at work  
Directive 94/9/EC on equipment and protective systems intended for use in potentially explosive atmospheres (ATEX)

Directive 89/686/EEC on personal protective equipment  
Council Directive 67/548/EEC on the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances

Directive 1999/45/EC concerning the approximation of the laws, regulations and administrative provisions of the Member States relating to the classification, packaging and labelling of dangerous preparations

Directive 97/23/EC on the approximation of the laws of the Member States concerning pressure equipment.

#### 15.2. Chemical safety assessment

A CSA does not need to be carried out for this product.

#### SECTION 16: Other information

Ensure all national/local regulations are observed. Ensure operators understand the flammability hazard. The hazard of asphyxiation is often overlooked and must be stressed during operator training. Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.

#### Advice

Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted. Details given in this document are believed to be correct at the time of going to press.

#### Further information

##### Note:

When using this document care should be taken, as the decimal sign and its position complies with rules for the structure and drafting of international standards, and is a comma on the line. As an example 2,000 is two (to three decimal places) and not two thousand, whilst 1.000 is one thousand and not one (to three decimal places).
