

BOC Gas Safety Awareness Workshops - 2010

Do you have the answers?

- Is oxygen flammable?
- What is the life of a regulator?
- Should Acetylene or Propane cylinders be stored horizontally?
- Should fuel gas pipelines be made of copper?
- What is the safest way to move cylinders?
- Is Acetylene lighter or heavier than air?
- Can oxygen be stored next to acetylene?
- How would you leak check your system?
- Is it safe to re-light a torch once a flashback has occurred?
- Will nitrogen support life?

Let BOC provide you with the answers to these vital questions - ensuring the way you store, use and move gas is safe for you, your employees and your business

BOC host **Gas Safety Awareness** workshops in various locations across Ireland, the dates of which are overleaf. BOC recommend these training courses for welders, safety offices and technicians, to ensure you're working to best operating practices and understand the avoidable hazards

And if you can't get a day out of work - let us come to you! We can also come to your place of work and host a workshop for 10 or more of your employees!

Topics covered in the workshop:

- Introduction and Legislation
- Health & Safety
- Cylinders and Valves
- Gas Properties
- Transportation
- Storage
- Handling
- Gas Control Equipment
- Flame Cutting
- Special Gases
